Default
Help LAYERS SHIFTED

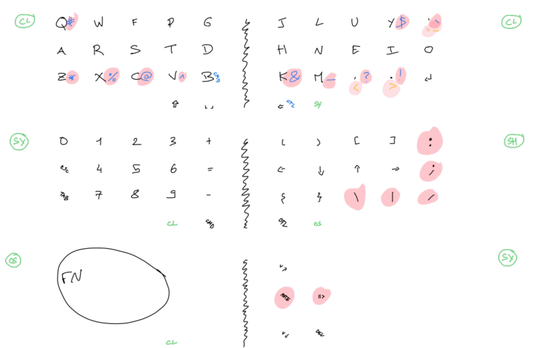
ORIGINAL

* missing

Maybe update with a fake Shift Key that's more intuitable for common Shifted Keys

E.g. : shift + . → ! hold . → <
shift + , → ? hold , → >

Add hold @ second layer?



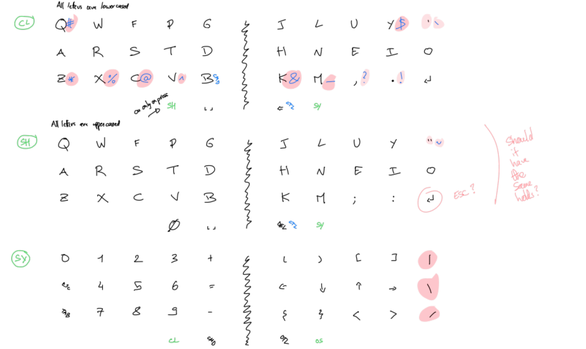
CUSTOM SHIFT

Can be done with KEY_OVERRIDES

Shift + . → : Del
Shift + , → ;
Shift + ; → ?

(Maybe) Shift + ↵ → Esc

All letters are lowercased



Should it hold Esc Space hold?

All letters are uppercased
